Election/Restrictions

1. Applicant's election without traverse of Group III-3, claims 51-54, in Paper filed October 31, 2006 is acknowledged. Moreover, claims 1-65 were canceled. Claims 66-79 were added.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 66-79 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The subject matter "electrically conductive terminal pin being electrically insulated from the case" is critical or essential to the practice of the invention, but not included in the claim, is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). In the instant specification, the pin needs to be insulated from the case by dielectric disks (16,18) and a glass hollow cylinder (20) to prevent short-circuiting in the battery. See page 6.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nemoto et al. (US 6,387,561) and Watanabe et al. (US 6,114,059) do not teach the pin is in electrical communication with the first electrode strip.
